PROFESSIONAL SUMMARY

Full Stack Developer with 6+ years building and scaling production web applications for global clients across SaaS, e-commerce, CRM, and ERP. Expert in PHP/Laravel, React.js, Next.js, and Node.js, delivering REST APIs that serve 10,000+ concurrent users at sub-200ms p95 latency on AWS. Cut deployment time by 70% with Docker and CI/CD and reduced production bugs by 45% through automated testing. Strong in application security, SQL query optimization, and Git-based team workflows.

TECHNICAL SKILLS

Languages: PHP, Core PHP, PHP OOP, JavaScript, TypeScript, SQL, HTML5, CSS3

Frameworks & Libraries: Laravel (MVC, Blade, Eloquent ORM), WordPress, React.js, Next.js, Node.js, Express.js, Mongoose ODM, jQuery, Bootstrap, Bootstrap 5, Tailwind CSS

MERN Stack: MongoDB, Express.js, React, Node.js - full-stack JavaScript applications, RESTful APIs, JWT auth, Fastify.

Databases: MySQL, PostgreSQL, MongoDB, Redis, RDBMS, query optimization, indexing, eager loading

Cloud & DevOps: AWS (EC2, Amazon S3, Lightsail, RDS, Load Balancing), Docker, CI/CD (GitHub Actions, GitLab CI), Git, GitFlow, Linux/Ubuntu, LAMP, cPanel

APIs & Architecture: REST API design, Microservices, Service-Oriented Architecture, WebSockets (Laravel Reverb, Pusher), Firebase, SSR, SEO optimization, Web Scraping (Puppeteer)

Security & Testing: JWT, OAuth, CSRF/XSS protection, web application security, PHPUnit, Jest, unit testing

Integrations: Stripe, PayPal, Razorpay, NOWPayments, Twilio, WhatsApp Business API, OpenAI API, Google Maps, Lightspeed Retail API

CMS & E-Commerce: WordPress, OpenCart, Magento, Shopify

PROFESSIONAL EXPERIENCE

Full Stack Developer | N2R Technologies LLP, Noida, India

Jan 2022 – July 2026

- Built end-to-end CRM and ERP platforms in Laravel, managing the complete lead lifecycle from acquisition to conversion.
- Constructed reactive Single Page Applications (SPAs) using React.js and Next.js, supported by robust Laravel and Node.js backends, including real-time dashboards that cut client-reported UI bugs by 45%.
- Architected and managed scalable cloud infrastructure on AWS (EC2, Lightsail, Amazon S3, RDS) using load balancing and LAMP stack configurations to support high-traffic web applications with high availability and minimal latency.
- Built low-latency, event-driven backends with WebSockets (Laravel Reverb, Pusher) integrated with React and Next.js frontends for real-time state synchronization and live notification feeds.
- Engineered secure RESTful APIs implementing strict JWT/OAuth authentication and CSRF/XSS protection across 50+ mobile applications, maintaining a record of zero post-launch security incidents.
- Integrated enterprise-grade third-party services across production applications, including Stripe, Twilio, Razorpay, NOWPayments, WhatsApp Business API, OpenAI API, and Google Maps, plus WhatsApp automation flows that cut manual follow-up effort by 60%.
- Led migration of a monolithic Laravel application to a service-oriented architecture using Node.js microservices, and streamlined release cycles with automated CI/CD pipelines (GitHub Actions / GitLab CI), reducing deployment time by 70% and release-related downtime by 40%.
- Developed high-performance Node.js (Puppeteer) web scrapers for chemical and pharmaceutical supplier catalogues, processing 50,000+ SKUs with anti-blocking measures.

PHP Laravel Developer | N2R Technologies LLP, Noida, India

Jun 2019 - Dec 2021

- Built Laravel and MySQL backends for CRM and e-commerce platforms supporting 10,000 active users across 3 countries.
- Delivered Node.js REST integrations and dynamic WordPress themes for 12 client projects, reducing average delivery time by 30% through reusable component libraries.
- Optimized Eloquent ORM queries for an insurance KPI and renewals dashboard, cutting report load time from 8s to under 1s via indexed queries and eager loading.
- Designed responsive, cross-browser UI for client-facing portals and automated database backups and deployment scripts, collaborating with cross-functional teams using Git branching strategies (GitFlow) across 15 active repositories.

KEY PROJECTS

Swissvans.com (UK van leasing) | Laravel, Next.js, MySQL, AWS: REST API with Laravel Reverb WebSocket events powering a live scheduling UI that updates without page refresh.

Trostaparking.se (Sweden parking) | Laravel, Next.js, AWS: multilingual SSR frontend with SEO caching, plus a pipeline that scrapes and parses PDFs to normalize 50,000+ parking SKUs.

Mosaiekexpo.co.za (South Africa expo POS SaaS) | Laravel, Blade, MySQL: automated exhibitor onboarding, digital screening workflows, and real-time Lightspeed Retail API sync.

Greattutors.net (London LMS) | Laravel, jQuery, MySQL: homework automation, recorded video streaming, and an e-commerce engine that builds personalized exam papers.

Ranthamboretigerreserve.in (Rajasthan Tourism safari operator) | Node.js, React, MySQL: high-concurrency permit booking across 10 zones with multi-gateway payments and automated SMS/email confirmations.

EDUCATION & CERTIFICATION

Bachelor of Technology, Electrical Engineering | Noida International University | 2012 - 2016

Web Development & Designing | 6-Month Industrial Training, Amazing Training Basket Pvt. Ltd., Noida | 2019
